

Feed premix based on chelates for cattle

AminoCare CATTLE

Guaranteed content: Amino acids, Zn – 12,5%, Mn – 7%, Cu – 4,3%

Description and performance

AminoCare CATTLE is a feed premix prepared on the basis of amino acids (chelates) for cattle. **AminoCare CATTLE** is produced on the basis of Arkop's proprietary technology involving the use of chelates, i.e. microelement organic compounds with very high bioavailability whose quality has been proven by tests carried out by European laboratories. **AminoCare CATTLE** effectively supplements element deficiencies, ensures correct development of the organism and enhances animal health. The chelates comprised in **AminoCare CATTLE** are characterized by a very high level of chelation which makes it possible to provide the animal organism with such indispensable micro-elements as zinc, manganese and copper, in proportions selected especially for cattle.

Application of AminoCare CATTLE ensures:

- Reduced incidence of metabolic diseases
- Lower susceptibility to infections and diseases
- Increased bone density and stability
- Increased fertility
- Improved quality of milk and meat
- Reduced susceptibility to stress
- Better growth
- Higher milk production

Composition

- Contains amino acids

Microelement:	Zinc - Zn	Manganese - Mn	Copper - Cu
Contents:	12,5%	7%	4,3%

Dosage

- 3g/unit per day

On our customers' request we can prepare premixes enriched by vitamins and additional amino acids.
